NPDES FORM 6100-28

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY WASHINGTON, DC 20460 ANNUAL REPORT FOR STORMWATER DISCHARGES ASSOCIATED WITH INDUSTRIAL ACTIVITY UNDER THE NPDES MULTI-SECTOR GENERAL PERMIT

FORM Approved OMB No. 2040-0004

Permit Information	
The data in this form was migrated and may not reflect all data previously entered by the permittee.	
Report Year: 2016	
Reporting Period: 1/1/2016 to 12/31/2016	
NPDES ID: NHR053159	
Facility Information	
Facility Name: NYLON CORPORATION OF AMERICA	
Facility Point of Contact	
First Name Middle Initial Last Name:	
Phone: Ext.:	
Email:	
Facility Mailing Address	
Address Line 1: 333 SUNDIAL AVENUE	
Address Line 2:	City: MANCHESTER
ZIP/Postal Code: 03103	State: NH
County or Similar Division: Hillsborough	
General Findings	
Provide a summary of your past year's routine facility inspection documentation (see Part 3.1.2 of the permit). In addition, if you are an operator of an airport facility (Sector S) that is subject to the airport effluent limitations guidelines, and are complying with the MSGP Part 8.S.8.1 effluent limitation through the use of non-urea-containing deicers, provide a statement certifying that you do not use pavement deicers containing urea (e.g., "Urea was not used at [name of airport] for pavement deicing in the past year and will also not be used in 2015." (Note: Operators of airport facilities that are complying with Part 8.S.8.1 by meeting the numeric effluent limitation for ammonia do not need to include this statement.)	
All four quarterly inspections were completed as required by th	e permit. No evidence of storm water pollution was seen.
Provide a summary of your past year's quarterly visual assessment documentation (see Part 3.2.2 of the permit).	
Quarterly visual assessments were performed and documented in accordance with the permit. No evidence of storm water pollut ion was detected.	
For any four-sample (minimum) average benchmark monitoring exceedance, if after reviewing the selection, design, installation, and implementation of your control measures and considering whether any modifications are necessary to meet the effluent limits in the permit, you determine that no further pollutant reductions are technologically available and economically practicable and achievable in light of best industry practice, provide your rationale for why you believe no further reductions are achievable (see Part 6.2.1.2 of the permit). Enter "NA" if not applicable.	
NA	
Provide a summary of your past year's corrective action documentation (See Part 4.4 of the permit). (Note: describe the status of any outstanding corrective action(s).) Also describe any incidents of noncompliance the permit.	
One corrective action remains open. The benchmark for Zinc was firm to focus on an improvement. The cause of the high Zinc le As "clean sampling techniques" are employed, a reduction in Zin as monitoring continues.	vels is now seen as due in part by poor sampling techniques.
